

A METHOD AND SYSTEM OF ILLUMINATION WITH A PLURALITY OF CANDLES

ABSTRACT OF THE DISCLOSURE

- 5 An illumination system includes a plurality of candles having a plurality of different illumination durations. The illumination durations of each candle are designed to correspond to the timing of an event such as a dinner party or a cocktail party. As the evening progresses the candles burn out in succession, progressively dimming the lighting. By packaging the candles together, a candle illumination system is provided with pre-determined dimming times.
